

Air Waybill Settlement Service

We capture all Air Waybills and Debit-/Credit Memos in our databank system. All net-fares and special agreements are also stored and automatically added to the Air Waybills. Additional charges, e.g. fuel surcharges, are as well calculated automatically through the software system, so data capture errors are brought to a minimum. Then the CASS files are produced and uploaded into the IATA/CASS system. CASS processes the data and invoices the agents.

Your benefits are:

- fast data capture of AWBs
- prompt settlement via IATA/CASS
- increase in quality and speed
- automatic net-rate calculation and professional data capture
- process costs are reduced considerably
- employees are relieved from labour intensive routine work
- all AWBs are recorder and stored

Corporate Profile

Lamberth Airline Solutions is a service provider for the international air transport industry.

We serve over 15 airlines in more than 20 countries.

We market our **proprietary software, which our customers use to optimize their back office activities** e.g., in their accounting, sales and direct marketing departments. We also offer our customers a complete range of outsourcing services for complete back office processes, supported by software systems and a professional and highly knowledgeable staff.
