

## Credit Card Management

We accomplish the entire process and management of credit card sales transactions to the appropriate card companies and banks (acquirers) for you. The credit card data are sent automatically by our system to the designated bank and the complete validation and transfer process of credit card sales is performed.

All BSP- and Direct Sales per credit card are processed through our system. These sales are transferred to the single credit card companies via their specific interfaces, so the accurate and timely settlement of all data is ensured.

Further we perform all cash/credit regulations, the transfer of UCCT and the handling of Transportation Credit and UCCCF. Furthermore we check sales without contract and bill missing amounts to agents.

*Credit Card Management Process*

Throughout our web-based tracking-system all transactions are constantly observed and if necessary immediate measures can be assumed for securing the settlements. All transactions are monitored and detailed reports are provided. Each credit transaction is reported in your BSP-sales analysis as well as in the HOT-data with invoice number and the recipient information.

Easy and cost saving centralisation of airlines funds through a single bank acquirer as well as settlement in one designated currency is possible. All transactions and payment details are reported and balanced.

***Your benefits are:***

- most cost effective service to settle your credit card transactions worldwide
- cost effective, timely and accurate credit card settlement with the credit card companies
- all types of credit cards are processed such as VI, MC, AX, DC, TP
- BSP- and Direct Sales submission
- acceleration of the credit card submission process through high level of automation
- flexible customisation of services
- automatic balancing of payments
- global coverage

---

***Functionalities:***

- multi-currency processing with acquirers and card companies
- process-cost cuttings through relief of staff
- centralisation of funds quickly in the settlement currency of your choice
- reduced fees possibility through usage of one acquirer for multiple locations
- shorter processes and time saving due to high level of automation
- secure and reliable file transfer to designated banks
- no initial investments are necessary
- all system maintenance is performed at our data centre
- transactions are validated to current industry and card company requirements

### **Statistics:**

- web-based platform for transaction tracking and statistical analysis of credit card sales
- easy and fast access to all data and information 24/7 worldwide
- management statistics per month with year to date and year on year comparisons
- access to all historical data of credit card submissions and sales

---
