

Ticket Control Software - TCS

The Ticket Control Software is an easy to handle software application for self-auditing the BSP-sales. It simplifies the labour-intensive and costly administrative and controlling activities of ticket sales through the use of a modern and user friendly software.

The Ticket Control Software is a software system which provides the user with a complete visualisation of all ticket information and complete details with all related documents. The system links various data such as tickets, related refunds, exchanges and reissues as well as agency debit and credit memos.

Comprehensive search functionalities as per passenger name, ticket type and date of issue are performed. Detailed views of the payments such as for combined payments with cash and credit card are supported.

The Ticket Control System checks automatically all fares, commissions, taxes, security fees etc. of ticket sales via CRS/BSP. All electronic files/HOT are loaded and stored in the system. Special reports simplify the process of auditing refunds, exchanged tickets, AD tickets etc. Specialised modules such as Flown Revenue or Direct Sales, allow the TCS to be adapted to specific customer requirements.

The differences detected are charged to the relevant travel agency by Agency Debit Memo via BSP. Extensive sales statistics on re-debited revenue are generated and can be exported into Excel-files and easily adapted to company reporting standards.

A straightforward upload of ACDMs via BSPLink mass-upload is provided. The TCS can either be installed on local PCs and networks or is available on an ASP basis via the internet.

Your benefits are:

- a fully automatic audit
- quick and accurate audit results
- increased cash flows
- reduction of internal process costs
- revenue protection
- enforcing business discipline among travel agents
- high level of flexibility in audit requirements
- easy interfacing with airlines internal software systems
- an inspiring investment/revenue recovery ratio

Corporate Profile

Lamberth Airline Solutions is a service provider for the international air transport industry.

We serve over 15 airlines in more than 20 countries.

We market our **proprietary software, which our customers use to optimize their back office activities** e.g., in their accounting, sales and direct marketing departments. We also offer our customers a complete range of outsourcing services for complete back office processes, supported by software systems and a professional and highly knowledgeable staff.
