

## Hotel Statistics

Comprehensive Hotel statistics give you a complete picture of your current booking situation, the occupancy and the future situation and therefore fast reactions to changing market and booking conditions can be made. The Hotel statistics are an important tool for operation and planning. Capacity bottlenecks as well as occupancy problems are recognised at an early stage and reactions can be taken immediately.

Statistics per:

- bookings daily, weekly, monthly, yearly
- occupancy and turnover of single hotels
- occupancy and turnover per single room, double room, suites etc.
- average number of travel days
- capacity control

## Corporate Profile

**Lamberth Travel Solutions** is a service provider for the international air travel industry.

We offer our customers a **wide range of outsourcing services and consultancy for complete back office processes**, supported by own software systems and our dedicated travel industry professionals.

We globally market our proprietary software and web-services, which our customers use to **optimize their back office activities** e.g., in the Revenue Accounting, Finance, Administration and Sales department.

Through our highly automated Business Process outsourced (BPO) services and state-of-art software systems, **our clients improve their financial performance** and can focus on their core and strategic issues.
